Re: Utah Power & Light Company's
Request for Pole Attachment
Certification to the FCC

PA-81-0013

Dear Mr. Chairman:

On behalf of Wentronics, Inc., a company which provides cable television service to the town of Moab, Utah, we hereby oppose Utah Power & Light Company's request that your Commission certify to the Federal Communications Commission that you have complete regulatory authority over cable television systems within the state of Utah. Wentronics respectfully submits that the Utah Public Service Commission ("Utah PSC") lacks the appropriate statutory authority to regulate the rates and terms of cable television pole attachment agreements.

In establishing a procedure under which the FCC would withdraw its jurisdiction over pole attachment agreements for states that provided proper "certification", FCC Rule Section 1.1414 expressly states that unless a state can certify that:

1. It regulates rates, terms, and conditions for pole attachments, and
2. In so regulating such rates, terms and conditions, the state has the authority to consider and does consider the interests of the cable television services, as well as the interests of the consumers of the utility services, it will be rebuttably presumed that the state is not regulating pole attachments. (emphasis added).

Milly O. Bernard, Chairman
January 29, 1981
Page Two

Wentronics submits that it is clear from the language of Utah Code Ann. Section 54-4-13 (1953) that no such authority to regulate the rates and terms of pole attachment agreements is vested in the Utah PSC. Sub-part (1) is inapplicable to cable television because it expressly treats only joint property use of two or more public utilities. Cable television, of course, has consistently been held not to be a public utility. 1/

Sub-part (2) does, in an extremely limited manner, address cable television. That sub-section, however, is confined to describing the conditions under which a cable system may remain on public utility poles. There is absolutely no language conferring to the Utah PSC the necessary jurisdiction to regulate pole attachment agreements in consideration of what impact their rates and terms will have upon cable subscribers.

In a similar situation, the Florida Supreme Court in Teleprompter Corporation v. Hawkins 2/ held that the Florida Public Service Commission lacked the necessary jurisdiction to regulate pole attachment agreements and, therefore, had improperly certified to the Federal Communications Commission (see the attached case). The FCC was subsequently forced to delete Florida as a certified state. 3/ Wentronics would here seek to avoid similar time consuming judicial and administrative proceedings.

1/ Greater Fremont, Inc. v. City of Fremont, 302 F. Supp. 652 (N.D. Ohio 1968), aff'd sub nom., Wonderland Ventures, Inc. v. Sandusky, 423 F.2d 548 (6th Cir. 1970); Orange County Cable Communications Co. v. City of San Clemente, 59 Cal. App.2d 165, 130 Cal. Rptr. 429 (1976); Illinois-Indiana Cable Television Ass'n v. No. 56,291

TELEPROMPTER CORPORATION, ET AL.,
Petitioners,

vs.

PAULA F. HAWKINS, ET AL.,
Respondents.

[May 29, 1980]

BOYD, J.

This cause is before us to review an order by the Public Service Commission certifying that it has authority to regulate "pole attachment" agreements. We have jurisdiction. Art. V, § 3(b)(3), Fla. Const.

Pole attachment agreements are lease agreements between utilities and cable television companies which authorize the latter to use the excess space on utility poles for the purpose of providing their customers cable television service. Because the utilities have superior bargaining position by virtue of their ownership and control over utility poles along with the accompanying easements, Congress granted the Federal Communications Commission (FCC) the authority to regulate these agreements except where such matters are regulated by the state. Each such state needed to certify that:

- (A) it regulates such rates, terms, and conditions;
and
- (B) in so regulating such rates, terms, and conditions, the State has the authority to consider and does consider the interests of the subscribers of cable television services, as well as the interests of the consumers of the utility services.

Communications Act Amendments of 1978, Pub. L. No. 95-234, (47 U.S.C. § 224(c)(21)).

In response to this impending federal regulation, the commission sent notice of certification to the FCC. Subsequently, the commission gave notice and called for briefs from interested parties, following which it entered an order declaring that it has the authority to regulate pole attachment agreements. The petitioners claim that the commission does not have authority to regulate the agreements or consider the interests of cable television subscribers. We agree.

Several years ago the commission held that it could not require utilities to enter into pole attachment agreements. Southern Bell Tel. & Tel. Co., 65 PUR 3d 117 (Fla. Pub. Ser. Comm'n. 1966). In doing so it reasoned:

In 1913, when the Florida legislature enacted a comprehensive plan for the regulation of telephone and telegraph companies in this state, and conferred upon the commission authority to administer the act and to prescribe rules and regulations appropriate to the exercise of the powers conferred therein, the science of television transmission and the business of operating community antenna television systems were not in existence. The 1913 Florida legislature, therefore, could not have envisioned --much less have intended to regulate and control--the television transmission facilities and services with which we are concerned. This is exactly the same kind of situation described by the supreme court of Florida in practically identical language in its opinion in the case of Radio Teleph. Communications v. Southeastern Teleph. Co. (Fla. Sup. Ct. 1964) 57 PUR 3d 136, 170 So.2d 577, when it held that this commission did not have jurisdiction over radio communication service, notwithstanding the interconnection of such radio service with a regulated utility's telephone landline. As the court pointed out in that case, the legislature of Florida has never conferred upon this commission any general authority to regulate "public utilities." Traditionally, each time a public service of this state is made subject to the regulatory power of the commission, the legislature has enacted a comprehensive plan of regulation and control and then conferred upon the commission the authority to administer such plan. This has never been done in so far as television transmission and community antenna television systems are concerned. Community antenna television systems have never been defined as "public utilities" by the legislature, nor is there anything in this record which would justify the conclusion that such systems are vested with a public interest; in actual fact, they may be of such character as to justify public regulation and control. That, however, is a matter for determination by the state legislature. We must conclude on the basis of the record before us, and the present status of the laws of this state, that the Florida Public Service Commission has no jurisdiction or authority over the operations of community antenna television systems and the rates they charge, or the service they provide to their customers.

Id. at 119-20. See also, Twin Cities Cable Co. v. Southeastern Tel. Co., 200 So.2d 857 (Fla. 1st DCA 1967).

Since that decision there has been no relevant change in the commission's statutory grant of jurisdiction. Therefore the reasoning in that decision is still relevant. No reason was given for asserting jurisdiction other than to preempt the FCC from regulating pole attachment agreements. Although we share the concern about federal intervention in an area the state may be better equipped to handle, such concern is not enough to extend the Public Service Commission's jurisdiction. Only the legislature can do that.

We therefore quash the commission's order.

It is so ordered.

The Supreme Court of Florida has ruled that the Florida Public Service Commission does not have jurisdiction to regulate rates, terms, and conditions for pole attachments. Teleprompter Corporation v. Hawkins, No. 56, 291 (May 29, 1980). Accordingly, Florida is deleted from this list.

- * "State", by Section 1.1402(g) of the Rules, means any State, territory, or possession of the United States, the District of Columbia, or any political subdivision, agency, or instrumentality thereof.

(This Public Notice supercedes the Public Notice of October 29, 1979.)
